Objective

As a proactive API Development and QA Intern, I bring a wealth of expertise in Java API development, manual testing, and test automation. Eager to secure a dynamic role where I can apply my in-depth Java knowledge to enhance API development practices and contribute to robust quality assurance processes. I am motivated to learn and grow within a collaborative team, delivering innovative solutions while honing my skills in API development and testing methodologies.

Experience

• ORANGE BUSINESS

August 2023 - Present

API Development & QA Intern

- Collaborated in coding and programming tasks, contributing to the software development life cycle.
- Conducted manual and automated testing, ensuring high-quality software deliverables.
- Automated test scripts for efficient regression testing and continuous integration.
- Communicated effectively with cross-functional teams, providing regular project updates.
- Generated comprehensive documentation for development and testing processes.
- Actively pursued learning opportunities to stay updated on industry trends.
- Demonstrated adaptability in a dynamic work environment with strong problem-solving skills..

Education

• Chitkara University, Rajpura, Punjab

2024

Bachelor of Engineering

8.97
